Information Bulletin No. IB25-018 **October 21, 2025**

INTERPRETATION
PESR Section 46
Historical Boilers Requirements

This information Bulletin replaces IB20-019, which has been withdrawn.

This Information Bulletin establishes that *Harmonized Requirements for Historical Boilers, Edition 3, Revision 0,* issued 2025-10-21, (AB-534) provides compliance guidance for owners of historical boilers with respect to Section 46 of the *Pressure Equipment Safety Regulation* (PESR). Part 1 and Part 2, Supplement 1 of the document are applicable to historical boilers intended to be operated in Alberta.

Harmonized Requirements for Historical Boilers was developed by the Technical Safety BC, Alberta Boilers Safety Association (ABSA), the Technical Safety Authority of Saskatchewan (TSASK), and the Manitoba Department of Inspection and Technical Services (ITS), to promote the consistent application of safety standards for historical boilers.

Harmonized Requirements for Historical Boilers addresses common requirements for the design registration, inspection, maintenance and repair of historical boilers. It also addresses certification of operators, and mobility requirements for owners who wish to operate a historical boiler in multiple participating jurisdictions. Part 1 of the document contains common requirements approved by all participating organizations. Part 2 of the document contains jurisdiction specific supplements.
