

Information Bulletin No. IB17-016

August 24, 2017

Quality Management Systems for Pressure Piping Construction

This Information Bulletin supersedes IB13-001 which is hereby withdrawn.

A certificate of authorization permit is required for a person to construct, repair or alter pressure piping under Section 11 of the Pressure Equipment Safety Regulation AR 49/2006 (PESR). Applications for such a permit are subject to Section 12 of the PESR. Permit holders' duties are set out in Section 13.

This Information Bulletin establishes that ABSA document AB-518 "*Pressure Piping Construction Requirements*" Edition 8, Revision 0, Issued 2017-08-24, specifies information required by the Administrator from an organization that applies for a certificate of authorization permit as required under Section 11; and specifies features of a quality management system that may be acceptable to the Administrator, as provided for under Sections 12 and 13 of the PESR.

Organizations applying for the first time for a certificate of authorization permit are required to meet the requirements of the current AB-518 document prior to the certification.

Organizations which currently hold a certificate of authorization permit are required to meet the requirements of the current AB-518 document and will be audited accordingly during re-certification.
