

the pressure equipment safety authority

## ABSA 2017 Code Update Seminar

The pressure equipment business is ever-changing and with it, so are related codes and standards.

The pace of industry is also constantly accelerating; it's never too soon to sharpen your competitive edge. By attending ABSA's Annual Code Update Seminar you will receive the best possible pressure equipment information directly from ABSA technical experts.

The agenda for the 2017 seminar has now been set and can be found at [www.absa.ca](http://www.absa.ca). The most significant changes are to ***ASME Section I: Rules for Construction of Power Boilers*** and to ***ASME Section VIII-2: Alternative Rules for Construction of Pressure Vessels***. Additional topics include changes to ABSA publications and expected changes to future editions of related codes and standards.

The seminar is to be presented in **Edmonton Oct 13, Calgary Oct 20, Red Deer Oct 27**. To register or for additional information, please email [Bencharski@absa.ca](mailto:Bencharski@absa.ca) or visit our website at [www.absa.ca](http://www.absa.ca) or call 780.437.9100
