

Information Bulletin No. IB16-020

December 15, 2016

Power Engineers Regulation Equivalent Certificates

This Information Bulletin provides an interpretation of Section 26 of the *Power Engineers Regulation* (AR 85/2003) respecting equivalent power engineer certificates.

Interpretation

Equivalent certificates

26(1) If the Administrator determines that a person holds a certificate from a jurisdiction outside Alberta that is equivalent to a certificate of competency specified in this Regulation, the Administrator may, on application, issue an equivalent certificate of competency.

(2) A certificate of competency issued under this section may be issued subject to conditions imposed by the Administrator.

Effective January 1, 2017, an equivalent certificate of competency may be issued under Section 26 of the Power Engineers Regulation to an applicant that provides satisfactory verifiable evidence of the validity of the certificate issued by the jurisdiction outside Alberta, and passes an examination on Alberta legislation concerning power engineers and the equipment they operate.

The conduct and subject matter of the examination shall be as described in ABSA document AB-269 *Reference Syllabus for Power Engineers Transferring to Alberta*.
