

Information Bulletin No. IB21-010 WITHDRAWN 2021-11-19
Replaced by IB21-010 Rev.1

October 29, 2021

INTERPRETATION

Pressure Piping Alternative Test Methods

As provided for under Section 30(2) of the *Pressure Equipment Safety Regulation*, this Information Bulletin establishes that ABSA document AB-519, *Pressure Piping Alternative Test Methods*, Edition 2, Revision 3, issued 2021-10-29, specifies requirements that must be included in an owner-user integrity management system procedure to allow the use of alternative test methods for an ASME B31.3 closure weld without individual acceptance from ABSA for each closure weld. This information bulletin supersedes IB20-017 which has been withdrawn.

AB-519 affects owner-users that choose to develop and implement a procedure that following successful audit by an ABSA safety codes officer provides pre-authorization of alternatives to hydrostatic testing of closure welds in pressure piping systems.
