

### REQUEST FOR EXEMPTION

Alberta Regulation 56/2006 2(2)c

(The exemption is not applicable to pressure vessels or pressure piping)

<b>Boiler</b>	
<b>Boiler "A"</b>	
<b>Serial No.</b>	
<b>Manufacturer</b>	
<b>CRN</b>	

The boiler will be operating under the following conditions:

- Hot water heating system, and
- is connected to an expansion tank that is fully vented to the atmosphere and,
- has no valves or other obstructions to prevent circulation between the boiler and the expansion tank.

We will ensure that the system remains fully vented.

We will request approval from ABSA prior to operating the system above atmospheric pressure.

We request that the above boiler be removed from annual fees.

**NOTE:** If any repair or alteration is made to this boiler without prior acceptance, the boiler can no longer be operated in "pressure service".

The owner of this boiler is responsible for ensuring that the above boiler is accepted by ABSA prior to being returned to pressure service in the Province of Alberta.

All requirements of the Safety Codes Act still apply.
